## Meetings with "Rīga Forests" and "Latvijas valsts meži"

- On **September 4, 2023** - Riga forests
- September 7, and November 1, LVM

# Reserchers night at the University of Latvia

- On September 29, 2023, LIFE PeatCarbon project senior expert Līga Strazdiņa and public relations specialist Diāna Nemme participated in the "Reserchers Night" organized by the University of Latvia (UL) in the "House of Nature" of the UL.
- 
- The event "Reserchers Night" in Latvia takes place every year on the last Friday of September during the event "European Researchers' Night" initiated by the European Commission. It's purpose is to bring scientific research closer to society, promoting especially young people's interest in science and it's role in human daily life.
- 
- The visitors of "Reserchers Night" were introduced to the LIFE PeatCarbon project, importance of protection and restoration of mires, as well as the plants collected in Melnais Lake Nature Reserve, like *Oxycoccus palustris*, *Drosera rotundifolia*, *Ledum plaustre*, *Lycopodium clavatum*, *Eriophorum vaginatum*. Sphagnum mosses were especially highlighted. Films about mire restoration projects were shown at the venue.

## Conference on Good practices in peatland restoration

JTP (Just transition platform) GROUNDWORK TA to LV

Photo exhibition "In the peatlands from -30°C to +30°C plants, animals and researchers"

Work for the  
photo  
exhibition

Progress on PHOTO EXIBITION

# Meeting of Latvian LIFE projects

- On November 3rd, 2023, the seventh meeting of Latvian LIFE Program projects was held. Purpose of this event was to inform the participants about Latvian LIFE project results, activities and challenges, as well as to share experiences and discuss current issues related to the implementation of LIFE projects.
- 
- In total 31 representatives from 9 Latvian LIFE projects participated in the event. LIFE PeatCarbon project was represented by Māra Pakalne, Pēteris Āboliņš, Diāna Nemme and Andis Kalvāns. In the first part of the event, participants were guided to 2 excursions - Nature park "Ragakāpa" and Kaniera Lake in the Ķemeri National Park. Representatives from LIFE-IP LatViaNature project shared their experience on dune, meadow and calcareous fen management.
- 
- In the second part of the meeting, representatives of Latvian LIFE projects shared information about the project activities. LIFE PeatCarbon project manager Dr. Māra Pakalne gave a presentation on current situation and future plans. Presentations were followed by the discussion part.
- 

# Thanks for the attention!
